

The Open Group® Certification for People

TOGAF® 9 Part 1 Practice Test

Version 1.0.8

April 2018

The Part 1 Practice Test is representative of the content covered in the TOGAF 9 Part 1 Examination. It includes question formats found in the actual examination. It also includes questions of varying difficulty. A candidate's performance on this Practice Test does not guarantee similar performance on the actual examination.

4.	Bonus Test	20
5.	Bonus Test Answers	30

SAMPLE

1. Instructions

This is a simple multiple-choice test. This test should be taken as a closed book test. There is one correct answer for each question, scoring 1 point. You need to score 24 or more points¹ out of a maximum of 40 to pass this test.

Please read each question carefully before reading the answer options. Be aware that some questions may seem to have more than one right answer, but you are to look for the one that makes the most sense and is the most correct.

SAMPLE

¹ Note that this pass mark may differ from the live TOGAF 9 Part 1 Examination. Consult The Open Group certification website for the latest information on examination pass marks.

2. Examination

Item 1

Question:

Which one of the following best describes the TOGAF standard?

- A. A framework and method for architecture development
- B. An architecture pattern
- C. A method for developing Technology Architectures
- D. A method for IT governance

Item 2

Question:

Which part of the TOGAF standard provides a number of architecture development phases, together with narratives for each phase?

- A. Introduction
- B. Architecture Development Method (ADM)
- C. ADM Guidelines and Techniques
- D. Architecture Content Framework
- E. Enterprise Continuum and Tools

Item 3

Question:

According to the TOGAF standard, all of the following are suggested characteristics of an architecture framework, *except* _____

- A. A common vocabulary
- B. A list of recommended standards
- C. A method for designing a target state of the enterprise in terms of building blocks
- D. A set of structures which can be used to develop a broad range of architectures
- E. A software development lifecycle method

Item 4

Question:

Which of the TOGAF architecture development phases includes the development of Data and Application Architectures?

- A. Phase A
- B. Phase B
- C. Phase C
- D. Phase D
- E. Phase E

Item 5

Question:

Which one of the following does the Architecture Content Framework describe as a work product that is contractually specified, formally reviewed, and signed off by the stakeholders?

- A. An artifact
- B. A building block
- C. A catalog
- D. A deliverable
- E. A matrix

Item 6

Question:

Which of the following best completes the sentence: The Enterprise Continuum _____

- A. describes a database of open industry standards
- B. is an architecture framework
- C. is a technical reference model
- D. provides a method for architecture development
- E. provides methods for classifying artifacts

Item 7

Question:

According to the TOGAF standard, in which ADM phase does the initial implementation planning occur?

- A. Phase A: Architecture Vision
- B. Phase B: Business Architecture
- C. Phase C: Information Systems Architectures
- D. Phase D: Technology Architecture
- E. Phase E: Opportunities and Solutions

Item 8

Question:

According to the TOGAF standard, which of the following is the reason why the first execution of an ADM cycle will be more difficult than later cycles?

- A. Because there are few architecture assets available
- B. Because of lack of governance
- C. Because of insufficient trained architecture practitioners
- D. Because the Baseline Architecture must be fully defined across the enterprise

Item 9

Question:

As architecture deliverables and work products created in one ADM phase are modified by subsequent phases, how does the TOGAF standard suggest tracking the changes?

- A. Change control committee
- B. Document checkpoints and journaling

- C. Version numbers
- D. Workflow management system

Item 10

Question:

Complete the sentence: The architectures that address the detailed enterprise needs and business requirements within the Architecture Continuum are known as _____

- A. Foundation Architectures
- B. Industry Architectures
- C. Common Systems Architectures
- D. Organization-Specific Architectures

Item 11

Question:

According to the TOGAF standard, which one of the following is described as a view of the Architecture Repository and provides methods for classifying architecture and solution artifacts as they evolve?

- A. Architecture Landscape
- B. Architecture Governance Repository
- C. Enterprise Continuum
- D. Governance Log
- E. Standards Information Base

Item 12

Question:

Which one of the following represents the detailed construction of the architectures defined in the Architecture Continuum?

- A. Architecture Building Blocks
- B. Foundation Architectures
- C. Reference Models
- D. Building Blocks

Item 13

Question:

An organization has bought a large enterprise application. As a result, which of the following could be included in the organization's Solutions Continuum?

- A. A reference implementation of the Foundation Architecture
- B. A reference implementation of the Technical Reference Model for the organization
- C. Architecture Building Blocks for the organization's Industry-Specific Architecture
- D. Information for purchased products

Item 14

Question:

Complete the sentence: All of the following are technology-related drivers for architecture Change Requests, *except* _____

- A. asset management cost reductions
- B. new technology reports
- C. standards initiatives
- D. strategic change
- E. technology withdrawal

Item 15

Question:

Complete the sentence: In Phase C, when an existing application is to be replaced, the Data Architecture should _____

- A. be re-factored to align with the technology infrastructure
- B. describe how this change impacts other projects
- C. identify the data migration requirements
- D. include the application interoperability requirements
- E. estimate the effort required to overcome any issues

Item 16

Question:

The approach of the Preliminary Phase is about defining “where, what, why, who, and how we do architecture” in the enterprise concerned. Which one of the following statements is *not* correct?

- A. “Where” can be seen as scoping the enterprise concerned
- B. “Why” can be seen as the key drivers and elements in the context of the organization
- C. “Who” can be seen as defining the sponsor responsible for performing the architectural work
- D. “How” is determined by the frameworks selected and the methodologies that are going to be used

Item 17

Question:

In which phase of the ADM are the gap analysis results from the four architecture domains taken into account?

- A. Phase E
- B. Phase F
- C. Phase G
- D. Phase H
- E. Requirements Management
